

Biological Resource GIS - Rock Outcrops

SDE Feature Class

Tags

Biological Resource GIS, BRG, critical environmental features, CEFs, habitat, ecology

Summary

Critical environmental features (CEFs) are defined in the City of Austin Land Development Code 25-8-1.

Description

This dataset represents Rock Outcrop Critical Environmental Features (CEFs) identified during the development review process since 1995. Prior to 1995, data is either unavailable or lost. Rock Outcrop CEFs were digitized from construction plans, environmental assessments, and City of Austin staff field observations into a versioned SDE database using ArcMap.

There are no credits for this item.

Use limitations

This product has been produced by the Watershed Protection Department for the sole purpose of geographic reference. No warranty is made by the City of Austin regarding specific accuracy or completeness. For planning, modeling, and inventory purposes only. Actual feature location is subject to on site survey. Not all CEFs in the City limits or ETJ have been identified. This layer constitutes only known CEFs for sites that have been through the development review process since 1995.
